

Towards Saint  
Genis ( side C )

Towards airport  
( side A )

Spot the different widths of the spacers (light green)  
between the detector rails (dark green, follow the LHC  
axis) and the cavern paths (blue, horizontal).  
These rails are also visible when the detector is open

Spotting the LHC & ATLAS 1.4 deg tilt

Angle between the detector bottom structure and the cavern cable trays.  
( unfortunately only visible from -2 , not accessible to the visitors )
